

March 2011 ~ The Calgary Cursillo Movement ~ www.cursillo.ab.ca

Scents and Sensitivity

The Cursillo environment, like many other environments, supports public awareness messages of scent sensitivities that many people experience.

It isn't necessarily the odours that cause reaction but the off-gassing chemicals of products such as perfumes, colognes, deodorants, soaps, hair gel/spray etc.

Please be conscious of this sensitivity as we attend Weekends, Ultreyas, Meetings and any other Cursillo gatherings. Thank you.

Your consideration is really appreciated.
